

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follow. Insertions are shown underlined while deletions are ~~struck through~~.

Please replace the paragraph starting at page 37, line 17 with the following.

For example, in the measuring apparatus main body 9 to which the above-described use start treatment operation function has been added, software change including bias application timing control and hardware change including addition of a detection system such as a reed lead switch for use in the control and an indicator portion of a measuring unit main body portion are made as follows.

Please replace the paragraph starting at page 37, line 25 with the following.

① the sensor is installed in a position where the sensor is immersed in the storage liquid (detected by the reed lead switch, and the like);
